

Nondegradation Load Assessment Report

City of Bloomington

Table of Contents

1.0 Introduction.....	4
1.1 MS4 Permit Requirements	4
1.1.1 Loading Assessment	4
1.1.2 Nondegradation Report.....	4
1.1.3 Proposed SWPPP Modifications and Submittals to MPCA	5
1.1.4 Discharges to Wetlands.....	6
1.1.5 Discharges Affecting Source Water Protection Areas	6
1.2 Discussion of MPCA Guidance	7
1.2.1 Responses to Comments	7
1.2.1.1 Modeling Approach and Complexity	7
1.2.1.2 Average Annual Flow Volume	8
1.2.1.3 Wetlands.....	12
1.2.1.4 Special Waters Considerations	13
1.2.2 Guidance Manual for MS4s	13
1.2.2.1 Loading Assessment.....	14
1.2.2.2 Nondegradation Report	15
2.0 Loading Assessment	17
2.1 Land Use/Land Cover Compilation	17
2.2 Watershed Imperviousness Determination	22
2.2.1 2020 Imperviousness Determinations	23
2.2.2 Summary of Land Use/Land Cover by Watershed	23
2.3 Modeling Approach and Methodology for Loading Estimates.....	32
2.3.1 Average Annual Flow Volume	37
2.3.2 Total Phosphorus	38
2.3.3 Total Suspended Solids.....	39
2.3.4 BMP Implementation Modeling	41
2.3.4.1 Implementation of NURP Ponds.....	41
2.3.4.2 Implementation of Infiltration Basins with NURP Pretreatment	42
2.3.4.3 Implementation of Regional Infiltration Basins	42
3.0 Results and Discussion	46
3.1 Average Annual Runoff Volume	51
3.2 Total Phosphorus	55
3.3 Total Suspended Solids.....	55
3.4 Implications of Load Assessment Results	58

4.0 Recommendations for Nondegradation Report.....	59
4.1 Water Quality Trend Analyses and Implications for Nondegradation Report.....	59
4.2 Implications of Impaired Waters for Addressing Expanded Discharges in Nondegradation Report.....	60
4.3 Remaining Points to Address in Nondegradation Report	63
4.4 Recommendations for Using Load Assessment Modeling.....	63
References.....	65
